RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the restriction requirement set forth in the Office Action mailed May 5, 2003 (Paper No. 6), Applicants hereby elect Group I (Claims 1-33) for continued examination.

The Office Action further requires election of a combination of species for examination in the event no generic claims are found allowable.

Whereas Applicant believes that a generic claim will be found allowable, Applicant hereby elects one component from each of three species, with traverse.

I. Applicants submit that neuronal deficiency and memory function are not patentably distinct species. According to the invention both neuronal deficiency and memory function are addressed the same way. ("inducing formation of new neurons in the nervous system of the subject; and improving symptoms of the neuronal deficiency or improving memory function in the individual" *see* paragraphs 0014-0016). In the event the arguments are not found persuasive,

Applicants select "neuronal deficiency" with traverse.

II. Applicants select autologous cells

III. The Specification states that "one or more neuronal factors affecting the proliferation, differentiation and/or survival of neurons" are suitable for the invention. (*see* paragraph 0071). The neuronal factors are patentably indistinct as long as they perform the specified function. In the event the arguments are not found persuasive, Applicants elect nerve growth factor with traverse.

Applicants expressly reserve their right under 35 U.S.C. § 121 to file a divisional application directed to the non-elected subject matter during the pendency of this application, or an application claiming priority from this application.

Applicants request examination of the elected subject matter on the merits.

Dated: June 5, 2003

Respectfully submitted,

By 
Shantanu Basu
